

Basic Environmental Policy of TANAKA

Basic philosophy

We at TANAKA shall promote business activities in keeping with our aspiration of being a good corporate citizen that is aware of its own responsibility of bequeathing a sound environment to the next generation, trusted by society as a whole, and capable of existing in harmony with the community.

Environmental policy

We at TANAKA shall contribute to the formation of a recycling- oriented society through our core business of manufacturing precious metal products and other activities related to environmental preservation, including the recycling of precious metals and development of new energy using them.

1. We shall establish an environmental management system (EMS) and improve it continuously.
2. We shall comply with environment-related laws, regulations, agreements, international standards, industry standards, voluntary standards, and all other requirements to which we have given our consent.
3. Among the items with an influence on the environment in connection with our activities, products, or services, we shall make approaches to the following as priority tasks.
 - 1) Promotion of energy conservation and the use of renewable energy to mitigate global warming
 - 2) Promotion of resource conservation
 - 3) Reduction of the amount of waste derivation and recycling of waste
 - 4) Promotion of control and reduction of the amount of chemical substances with an adverse influence on the environment to prevent air pollution, water pollution, soil contamination, etc
 - 5) Manage chemical substances contained in products in accordance with domestic and international standards
 - 6) Promotion of water resource conservation
 - 7) Promotion of biodiversity conservation
4. To achieve the aims of this policy, we shall establish environmental objectives and targets, and execute activities of environmental preservation. We shall also review these objectives and targets at regular intervals.
5. We shall announce this basic environmental policy both inside and outside the company, and strive to improve the environmental awareness of all employees through environmental education.
